In this release:

- General: SRS option is now opt-in
- General: Added support for Startup.sh on macOS
- Bug Fix: Fixed a bug that could cause a crash with 7.1.5 related to SRS
- Bug Fix: Fixed an issue where the Pronto webmail was not properly displaying certain characters
- Bug Fix: Fixed an issue where the Startup.sh file was not properly handled on Linux
    - **Please Note**: When upgrading from 7.1.5 to 7.1.6, please make a backup of Startup.sh, as the package manager may remove this file when uninstalling
- Bug Fix: Fixed an issue where some pages of the admin interface took too long to load

Please Note: We have identified a bug in version 7.1.5 that can result in the process crashing. If you are running 7.1.5, we recommend upgrading to 7.16 as soon as possible.

Please Note: When upgrading from 7.1.5 to 7.1.6, if it exists, please back up /var/CommuniGate/Startup.sh, as the package manager may remove this file.

Please Note: Version 7.1.x of CommuniGate Pro requires updated license keys. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket here.

Please Note: SRS is enabled by default in version 7.1.5 and is now disabled by default in 7.1.6.
