CommuniGate Pro 7.1.7 Released

2024-04-09 - Josh Olson - Product Updates

Product: CommuniGate Pro 7.1.7

Release Date: 20 Feb 2024

Download: https://support.mailspec.com/en/downloads/71x

In this release:

- S/MIME: Pronto! can now sign messages using SHA-256
- S/MIME: Option for SHA-2 self-signed certificates has been implemented
- SNMP: Updated the information available in the MIB file with new object identifier. This will require the change of the OID in monitoring systems from 5678 to 61443.
- Pronto!: Fixed an issue that could cause the cursor to display incorrectly when using Pronto! with Safari
- Bug Fix: Fixed an issue with MX record prioritization/use
- Bug Fix: Fixed an issue where a message sent to a mailing list could potentially cause a crash
- Bug Fix: Fixed an issue where a message with a long subject was not displayed properly in the Basic webmail skin

Please Note: Version 7.1.x of CommuniGate Pro requires updated license keys. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket here.

Please Note: Support for FreeBSD 12 has been discontinued.

Please Note: There is a known bug/issue in CommuniGate Pro 7.1.7 and CommuniGate SPEC 8.0.4, related to the OS Password setting, that may cause the CommuniGate Pro/SPEC process to crash. If you suspect you are experiencing this issue, please upgrade to 7.1.8. If you have any questions/concerns, please raise a ticket with our support team here.
