2024-10-15 - Josh Olson - Product Updates

Product: CommuniGate SPEC 8.0.6

Release Date: 15 October 2024

Download: https://support.mailspec.com/en/downloads/8-0-spec

In this release:

- General: Added issue date to the Master > License page of the admin interface
- General: Modified default values for IMAP/POP channels and Real-Time node processors
- General: Windows installer and upgrade process improvements
- General: Port 9100, with SSL/TLS enabled, is now open by default for the HTTPU module
- General: Certificate Authority chain verification improvements
- Account: Added a feature to allow administrators to reset the sending quota for an account
- Bug Fix: Fixed an issue where SNMP elements were not displayed when using the admin interface Sparkle skin
- Bug Fix: Fixed an issue with SNMP elements using the old enterprise number resulting in charts not displaying
- Bug Fix: Fixed an issue where the SMTP enabled service could be visible and disabled after upgrading
- Bug Fix: Fixed an issue that could result in a crash when accessing glibc system calls
- Bug Fix: Fixed an issue that prevented access to the domain administration realm of the Basic admin interface skin
- Bug Fix: Fixed an issue with TLS 1.2 and TLS 1.3 where the end of data was not properly recognized
- Bug Fix: Fixed an issue where IMAPS and POP3S inter-cluster connections could timeout
- Bug Fix: Fixed an issue where a message sent to a mailing list could cause a crash when a Content-Type: multipart/alternative; header is present

Please Note: CommuniGate SPEC requires different license keys than CommuniGate Pro. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a

sales ticket here.

Please Note: Support for FreeBSD 12 has been discontinued.
