CVE-2021-44228 - Log4j

2022-01-04 - Josh Olson - General

Our developers have concluded that CommuniGate Pro is not at risk related to the CVE-2021-44228. While /opt/CommuniGate/WebSkins/hPronto-/log4javascript.js is part of the Pronto! skin, it is a javascript dependency. Only the log4j Java dependency is vulnerable.

If you have any questions, please log a support ticket here.

Thank you.
