CommuniGate Pro 7.0.1 (Beta) Released

2020-12-21 - Josh Olson - Product Updates

Product: CommuniGate Pro 7.0.1 (Beta)

Release Date: 12/21/2020

Download: https://support.communigate.com/en/downloads/7-0

In this release:

- Implemented new licensing system to unify cloud and on-premise keys
- Two Factor Authentication with ActiveAuth now part of the Pronto! Client
- Two Factor Authentication can be configured from XIMSS now

We expect to have the first stable release available in January, to include additional platforms. If you have any questions/concerns, please open a sales or support ticket here.

Please Note: Version 7 of CommuniGate Pro will require updated license keys. If you're looking to test with a production license, please submit a sales ticket using the link above.

Thank you.
