CommuniGate Pro 7.1.11 Released

2026-02-16 - Josh Olson - Product Updates

Product: CommuniGate Pro 7.1.11

Release Date: 16 February 2026

Download: https://support.mailspec.com/en/downloads/71x

In this release:

- CalDAV: Improved functionality related to free/busy information and Thunderbird
- Security: Updated the validity dates for trial certificates issued by the CommuniGate software
- Webmail: Added support for the Bulgarian language
- Bug Fix: Fixed an issue where hPronto- named skins were hidden in the administrative user interface
- Bug Fix: Fixed an issue where the copyright years were not updated
- Bug Fix: Fixed an issue where 2028 was the maximum future year that could be selected for various modules (calendaring, vacation rules, etc.)
- Bug Fix: Fixed an issue that could stop the CommuniGate service from starting when downgrading from CommuniGate SPEC
- Bug Fix: Fixed an issue where, if the 'Reject mail content if DKIM check fails' option is enabled, CommuniGate could crash

Please Note: Not all platforms will be available immediately, but they should be available shortly after the initial release.

Please Note: We identified an issue with the macOS installer and pulled that version down on Feb 20th. We will address that issue and provide an updated build as soon as possible.

Please Note: CommuniGate SPEC requires different license keys than CommuniGate Pro. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket here.
