## CommuniGate Pro 7.1.11 Released

2026-02-16 - Josh Olson - [Product Updates](#)

Product: CommuniGate Pro 7.1.11

Release Date: 16 February 2026

Download: <https://support.mailspec.com/en/downloads/71x>

In this release:

- CalDAV: Improved functionality related to free/busy information and Thunderbird
- Security: Updated the validity dates for trial certificates issued by the CommuniGate software
- Webmail: Added support for the Bulgarian language
- Bug Fix: Fixed an issue where hPronto- named skins were hidden in the administrative user interface
- Bug Fix: Fixed an issue where the copyright years were not updated
- Bug Fix: Fixed an issue where 2028 was the maximum future year that could be selected for various modules (calendar, vacation rules, etc.)
- Bug Fix: Fixed an issue that could stop the CommuniGate service from starting when downgrading from CommuniGate SPEC
- Bug Fix: Fixed an issue where, if the 'Reject mail content if DKIM check fails' option is enabled, CommuniGate could crash

**Please Note:** Not all platforms will be available immediately, but they should be available shortly after the initial release.

**Please Note:** We identified an issue with the macOS installer and pulled that version down on Feb 20th. We will address that issue and provide an updated build as soon as possible.

**Please Note:** CommuniGate SPEC requires different license keys than CommuniGate Pro. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket [here](#).
