CommuniGate Pro 7.1.9 Released

2024-06-11 - Josh Olson - Product Updates

Product: CommuniGate Pro 7.1.9

Release Date: 11 June 2024

Download: https://support.mailspec.com/en/downloads/71x

In this release:

- Bug Fix: Fixed an issue with SNMP elements using the old enterprise number resulting in charts not displaying
- Bug Fix: Fixed an issue that prevented the domain administration page(s) from displaying properly
- General: Update(s) to server license functionality

Please Note: We are tracking an issue with 7.1.9 related to SMTP and Enabled Services . Please see the this article for more information. While there is a workaround in place, we would recommend upgrading to version CommuniGate Pro 7.1.8.

Please Note: Version 7.1.x of CommuniGate Pro requires updated license keys. If you have any questions regarding the status of your subscription/license, or you would like to request keys, please open a sales ticket here.

Please Note: Support for FreeBSD 12 has been discontinued.

Please Note: There is a known bug/issue in CommuniGate Pro 7.1.7 and CommuniGate SPEC 8.0.4, related to the OS Password setting, that may cause the CommuniGate Pro/SPEC process to crash. If you suspect you are experiencing this issue, please upgrade to 7.1.8 or later. If you have any questions/concerns, please raise a ticket with our support team here.
